

ARGUSCREEN KIT

COMPLETE WITH
CP PROJECTOR,
SLIDE BOX AND
CARRYING CASE
\$30.00

A clever combination of screen, slide projection kit and compact carrying case covered in rich Cobra-grain Art Leather.

The ARGUSCREEN KIT contains adjustable projection screen 30" x 32" which is made of the finest quality flexible movie screen material which will not discolor or crack, giving your pictures extreme brilliance with perfect color gradation and depth. The surface of this screen is especially suitable for viewing color pictures and seems to give them a third dimensional effect. Even though picture is viewed from an acute angle, there is no distortion. Included in Kit is also the \$15.00 Model CP Projector and a portable indexed glass slide box of 100 slide capacity. Net weight 11 1/4 lbs. Shipping weight 13 lbs.

argus Candid Cameras

THE ALL AMERICAN MINIATURES

Argus—the world's most popular 35 mm. camera—presents new features and new values never heretofore offered in its price range. The original Argus changed the picture-taking habits of America in three short years. Modern, light, smart, simple, economical, the Argus is owned, used and enjoyed by more people than any other make of miniature camera. Now Argus offers the built-in, self-calculating exposure meter, which further simplifies and insures good picture-making. It is "scientific as a slide rule; simple as ABC." And, every Argus is 100% American made!

MODEL A—list price **\$10.00**

The world's lowest priced true miniature camera; the original Argus Model A, which sold for three years for \$12.50, is now available at the amazing low price of \$10.00.

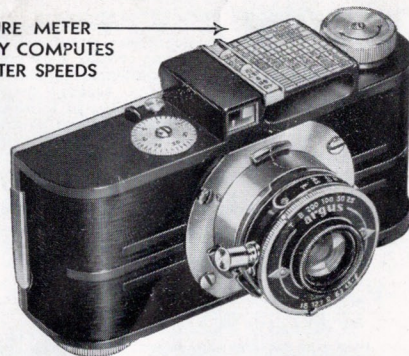

Public acceptance for the Model A brought such a huge volume of sales that substantial savings in manufacturing costs resulted. These savings are now being passed on to the public in the lowest price at which an accurate, precision-built miniature camera has ever been offered.

Model A offers "the most camera for the money" and a range of performance supplemented by over 40 accessories and attachments.

Fast, certified f:4.5 triple Anastigmat lens; 1/25 to 1/200 second shutter speed; only 5 inches long and 2½ inches high; weighs 14 ounces; built-in tripod socket; uses double-frame 35 mm. color or black and white movie film, in daylight-loading 18 or 36 exposure rolls.

Code Word	Finish	List Price
ANBAL	Black and Chromium	\$10.00

BUILT-IN EXPOSURE METER
AUTOMATICALLY COMPUTES
LENS AND SHUTTER SPEEDS

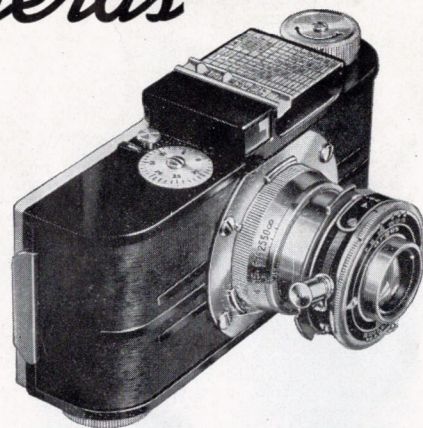

MODEL A2—list price **\$12.50**

Computations for shutter speed and aperture opening are eliminated by the built-in, self-calculating exposure meter of the NEW Model A2 Argus.

"If you can read, you can work it."

Fast, certified f:4.5 triple Anastigmat lens; 1/25 to 1/200 second shutter speed; uses double-frame 35 mm. color or black and white movie film, in daylight loading 18 or 36 exposure rolls; plunger-type shutter release; new lens-barrel front-plate with simplified, easy to read exposure markings; built-in tripod socket.

Code Word	Finish	List Price
ABEX	Black and Chromium	\$12.50

MODEL A2F—list price **\$15.00**

In the Model A2F, Argus precision manufacture and design have produced built-in facilities for critical focusing for distance as well as for ascertaining proper exposure. The focusing mount is calibrated for distances from 15 inches to infinity. It is designed so that complete folding-position of lens is possible. Extreme range of focusing mount eliminates need for supplementary portrait or copying lenses.

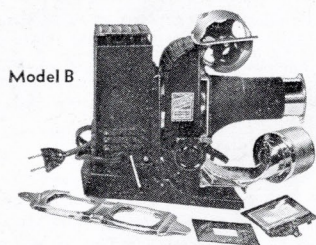

The Model A2F has the same self-calculating exposure meter as the Model A2.

Argus A, A2 and A2F cameras may be used in the Argus Models E, EA and EAE enlargers, when backs of cameras are removed, for enlarger objective lens.

Fast, certified f:4.5 triple Anastigmat lens; 1/25 to 1/200 second shutter speed; uses double-frame 35 mm. color or black and white movie film, in daylight-loading 18 or 36 exposure rolls; plunger-type shutter release; new lens-barrel front-plate with simplified, easy to read exposure markings; built-in tripod socket.

THE ARGUS PROJECTOR

SHOW YOUR
PICTURES
IN
LIFE SIZE
FULL COLOR

A powerful projector of highly improved design finished in crystal black and bright nickel chrome.

Triple condensing system consists of one meniscus and two biconvex condensing lenses made of ground and polished crown optical glass. Has well ventilated double-walled lamp house with ground and polished silvered mirror reflector and patented heat absorbing filter to protect the film under all conditions.

Aperture glasses size 1 3/8" wide and 2" high, bevelled on two edges. Objective lens S. V. E. Series OA-5" focal length.

Automatic rear aperture glass release, simultaneously relieves all pressure with advance of film, eliminating film scratches or damage to emulsion.

Film magazine capacity 500 single frames or 250 (Argus) double frames.

A supplementary mask is provided and is quickly interchangeable, allowing projection of single frame film.

Tilting lever allows raising or lowering picture to proper position.

Projector head swivels in either direction for horizontal, vertical or upside-down frames.

Has 10-foot rubber covered plug-in cord with push switch.

Projector size 7" high, 8" long, 3" wide. Net weight 3 1/2 lbs. Shipping weight 5 1/2 lbs.

Carrying case of 1/4" three-ply basswood covered in black leatherette, nickel trimmed and lined in green chamoisette. Size of case 9 3/4" long, 4 1/4" wide, 7 3/4" high. Net weight 1 1/2 lbs. Shipping weight 3 lbs.

SAFFO	SAF-8	Complete Kit for Model AF or A2F only, (Same as "S-8" without portrait and copy lenses which are replaced by red filter and safety screw.)	\$5.00

ARGUS RED FILTER

The red filter excludes practically all the color spectrum except red, thus reducing haze in aerial and distant landscape shots to a minimum. It lends a decided dramatic quality to many types of scenes and gives the much desired dark sky effect with panchromatic film.

It is absolutely necessary that the red filter be used with infra-red film. Interesting moonlight effects in daylight shots can then be obtained. Use of red filter requires five times normal exposure time with either panchromatic or infra-red film. This filter cannot be used with orthochromatic or other non-red sensitive films.

Code Word FILRED Part No. S-9 Description Red Filter List Price \$1.50

ARGUS COLOR FILTERS

Argus color filters for use when taking color pictures with "regular" Kodachrome and Dufaycolor film.

Type KA filter corrects for indoor pictures under photoflood lights when either "regular" Kodachrome or Dufaycolor film is used.

Code Word AMAZ Part No. S-12 Description KA Color Filter List Price \$1.75

The A-Ultra-violet haze filter for use with regular Kodachrome in daylight absorbs invisible ultra-violet and tends to overexpose the blues assuring better color correction.

Code Word ATRA Part No. S-13 Description A-Ultra-violet Haze Filter List Price \$1.75

ARGUS SAFETY SCREW

Now available for use in anchoring the Argus camera with greater safety in either the Deluxe carrying case or the "Redycase." This is a threaded stud with large knurled head which can be inserted in tripod socket to prevent the possibility of camera accidentally falling out of case.

Code Word SAFE Part No. X-3 Description Carrying Case Safety Screw Price \$3.30

ARGUS ENLARGERS

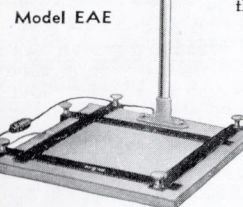

EASY
ECONOMICAL
FASCINATING

Make your own enlargements with this fast high-precision equipment.

Only in projection printing do you attain the ultimate in enjoyment and pictorial possibilities from your 35 mm. negatives. Print only the portion of your negative you desire, in any size you desire. Correct errors in composition that were unnoticed in your viewfinder.

NEW ILLUMINATION
GUARANTEES SHARPNESS
OF ENTIRE PRINT

The NEW Argus Enlargers, give a sharpness of definition and a new flat field illumination that rival the highest-priced enlargers. Both have the new Argus pre-focused, concentrated filament enlarging lamp—an outside frosted, 110 volt, 100 watt lamp—which is projected through

two clear condensing lenses by a metallic mirror. Light rays are concentrated; your negative is protected from damage by overheating by an entirely new system of optics and lamphouse design.

EMPLOYS ARGUS HIGH-PRECISION ANASTIGMAT LENSES

Both enlargers utilize the high-precision lenses of either Argus Model A, A2, AF or A2F Camera by simply removing the back cover and locking in position with lens spring.

For non-owners of Argus A, A2, AF or A2F cameras, a new f:5.6 Anastigmat enlarger lens is available. Bought separately, it can be used on either the EAE or the EA enlarger.

Lamp house and projection head are finished in crackle grey, with polished aluminum and non-reflecting black trim.

A built-in, swinging red filter which permits focusing with the sensitized paper in place is standard equipment.

Can be focused to needle-point sharpness easily and rapidly by a new adjusting control knob, without removing camera lens.

Improved negative holder prevents scratching, holds negative flat, without dust-catching glass, and will handle single 35 mm. negatives or strip film. Negative carrier may be removed and inverted to facilitate focusing for 11 x 14 prints or photomurals.

Model EAE Enlarger has easel built into the baseboard; permits framing and cropping of prints up to 8 x 10 inches. Baseboard is 14 x 14 inches.

Model EA is without easel, and baseboard measures 13 x 13 inches. All other specifications are identical to Model EAE.

Both EAE and EA Enlargers have plug-in cord and snap-switch. Height, 32 inches when extended.

Net weight, 10 pounds; shipping weight, approximately 14 pounds.

Code Word	Part No.	Description	List Price
